

Renting A High-Performance Drive

Exotic car rentals may be a common sight in US and Europe, but it wasn't until recently that this niche industry opened up in Singapore, thanks to Russian businessman Pavel Zotov.

Luxe Car Rental is the first exotic car rental company in Singapore with a selection of luxury sports cars starting from S\$688 a day. To date, there are five high-performance cars to choose from – the Lamborghini Gallardo Spyder, Porsche 911 Carrera S, Maserati Spyder, Porsche Boxster S, and Ferrari

F430 – and the company plans to expand the collection to a total of 10 cars in the near future.

High costs, under utilisation and depreciation of a luxury sports car in Singapore may deter many from owning one of these head-turners. But with a growing number of high net worth individuals here, the demand for these prized possessions is far from diminished.

Luxe Car Rental not only opens up an avenue for enthusiasts to experience the thrills of driving a supercar, it offers a good opportunity

for interested car buyers to try out the vehicles before actually making the big purchase.

"It was totally awesome to feel the raw passion of one of the greatest supercars. A once-in-a-lifetime opportunity to fully expose your senses in a true legend," said Jerry, one of Luxe Cars Rental's client.

Rental Requirements
Depending on the car model, clients have to be a minimum of 27 or 30 years old, with a driving experience of three or five years respectively. Luxe Car Rental also provides a mandatory one-hour familiarisation session before clients can take the wheel.

Rental rates are based on a one day (24-hour) period and insurance coverage is offered for all cars. First time customers are required to make reservations at Luxe Car Rental's office on Lower Delta Road. Subsequently, clients can request to have the car delivered to the airport, hotel, or any location of their choice upon successful reservation.

Affordable rates for long-period rental are available. Other value-added services include the provision of GPS/Navigation Systems on request (some

of the vehicles come with integrated GPS/Navigation Systems already), and prepaid cash cards with a minimum value of S\$100.

Dream Come True
For many who have never driven an exotic car before, this car rental experience presents a unique opportunity to drive the cars from some of the most exclusive manufacturers in the world.

"It was always a dream for my boys to have a ride in real Lamborghini Gallardo Spyder since they were collecting smaller models of this car. Driving this car with my sons was an unforgettable experience!" said car rental client, Natalia.

For tourists, renting these luxury cars gives them a tour of Singapore from a brand new aspect. For the discerning, this premier service is the perfect chance to sample the various supercars without the hassle of owning one. ■
